Social Security is an important source of retirement income for millions of Americans, but how much do you know about this program? Test your knowledge, and learn more about your retirement benefits, by answering the following questions.

Questions

1. Do you have to be retired to collect Social Security retirement benefits?

- a. Yes
- b. No

2. How much is the average monthly Social Security benefit for a retired worker?

- a. \$1,360
- b. \$1,493
- c. \$1,585
- d. \$1,723

3. For each year you wait past your full retirement age to collect Social Security, how much will your retirement benefit increase?

- a. 5%
- b. 6%
- c. 7%
- d. 8%

4. How far in advance should you apply for Social Security retirement benefits?

- a. One month before you want your benefits to start.
- b. Two months before you want your benefits to start.
- c. Three months before you want your benefits to start.

5. Is it possible for your retirement benefit to increase once you start receiving Social Security?

- a. Yes
- b. No

Answers

1. b. You don't need to stop working in order to claim Social Security retirement benefits. However, if you plan to continue working and you have not yet reached full retirement age (66 to 67, depending on your year of birth), your Social Security retirement benefit may be reduced if you earn more than a certain annual amount. In 2017, \$1 in benefits will be deducted for every \$2 you earn above \$16,920. In the calendar year in which you reach your full retirement age, a higher limit applies. In 2017, \$1 in benefits will be deducted for every \$3 you earn above \$44,880. Once you reach full retirement age, your earnings will not affect your Social Security benefit.

2. a. Your benefit will depend on your earnings history and other factors, but according to the Social Security Administration, the average estimated monthly Social Security benefit for a retired worker (as of January 2017) is \$1,360.¹

3. d. Starting at full retirement age, you will earn delayed retirement credits that will increase your benefit by 8% per year up to age 70. For example, if your full retirement age is 66, you can earn credits for a maximum of four years. At age 70, your benefit will then be 32% higher than it would have been at full retirement age.

4. c. According to the Social Security Administration, you should ideally apply three months before you want your benefits to start. You can generally apply online.

5. a. There are several reasons why your benefit might increase after you begin receiving it. First, you'll generally receive annual cost-of-living adjustments (COLAs). Second, your benefit is recalculated every year to account for new earnings, so it might increase if you continue working. Your benefit might also be adjusted if you qualify for a higher spousal benefit once your spouse files for Social Security.

Key Retirement and Tax Numbers for 2017

Every year, the Internal Revenue Service announces cost-of-living adjustments that affect contribution limits for retirement plans, thresholds for deductions and credits, and standard deduction and personal exemption amounts. Here are a few of the key adjustments for 2017.

Retirement plans

- Employees who participate in 401(k), 403(b), and most 457 plans can defer up to \$18,000 in compensation in 2017 (the same as in 2016); employees age 50 and older can defer up to an additional \$6,000 in 2017 (the same as in 2016).
- Employees participating in a SIMPLE retirement plan can defer up to \$12,500 in 2017 (the same as in 2016), and employees age 50 and older will be able to defer up to an additional \$3,000 in 2017 (the same as in 2016).

IRAs

The limit on annual contributions to an IRA remains unchanged at \$5,500 in 2017, with individuals age 50 and older able to contribute an additional \$1,000. For individuals who are covered by a workplace retirement plan, the deduction for contributions to a traditional IRA is phased out for the following modified adjusted gross income (AGI) ranges:

	2016	2017
Single/head of household (HOH)	\$61,000 - \$71,000	\$62,000 - \$72,000
Married filing jointly (MFJ)	\$98,000 - \$118,000	\$99,000 - \$119,000
Married filing separately (MFS)	\$0 - \$10,000	\$0 - \$10,000

Note: The 2017 phaseout range is \$186,000 - \$196,000 (up from \$184,000 - \$194,000 in 2016) when the individual making the IRA contribution is not covered by a workplace retirement plan but is filing jointly with a spouse who is covered.

The modified AGI phaseout ranges for individuals making contributions to a Roth IRA are:

	2016	2017
Single/HOH	\$117,000 - \$132,000	\$118,000 - \$133,000
MFJ	\$184,000 - \$194,000	\$186,000 - \$196,000
MFS	\$0 - \$10,000	\$0 - \$10,000

Estate and gift tax

- The annual gift tax exclusion remains at \$14,000.
- The gift and estate tax basic exclusion amount for 2017 is \$5,490,000, up from \$5,450,000 in 2016.

Personal exemption

The personal exemption amount remains at \$4,050. For 2017, personal exemptions begin to phase out once AGI exceeds \$261,500 (single), \$287,650 (HOH), \$313,800 (MFJ), or \$156,900 (MFS).

Note: These same AGI thresholds apply in determining if itemized deductions may be limited. The corresponding 2016 threshold amounts were \$259,400 (single), \$285,350 (HOH), \$311,300 (MFJ), and \$155,650 (MFS).

Standard deduction

These amounts have been adjusted as follows:

	2016	2017
Single	\$6,300	\$6,350
HOH	\$9,300	\$9,350
MFJ	\$12,600	\$12,700
MFS	\$6,300	\$6,350

Note: The 2016 and 2017 additional standard deduction amount (age 65 or older, or blind) is \$1,550 for single/HOH or \$1,250 for all other filing statuses. Special rules apply if you can be claimed as a dependent by another taxpayer.

Alternative minimum tax (AMT)

AMT amounts have been adjusted as follows:

	2016	2017
Maximum AMT exemption amount		
Single/HOH	\$53,900	\$54,300
MFJ	\$83,800	\$84,500
MFS	\$41,900	\$42,250
Exemption phaseout threshold		
Single/HOH	\$119,700	\$120,700
MFJ	\$159,700	\$160,900
MFS	\$79,850	\$80,450
26% on AMTI* up to this amount, 28% on AMTI above this amount		
MFS	\$93,150	\$93,900
All others	\$186,300	\$187,800

*Alternative minimum taxable income

You are generally not the "owner" of an inherited IRA. The practical result of this fact is that you can't mix inherited IRA funds with your own IRA funds, and you can't make 60-day rollovers to and from the inherited IRA. Spousal beneficiaries, however, may be able to assume actual ownership of an inherited IRA.

***If the traditional IRA owner died after age 70-1/2 and did not take an RMD for the year of his or her death, you must also withdraw any remaining RMD amount for that year.**

Five Things to Know About Inherited IRAs

When an IRA owner dies, the IRA proceeds are payable to the named beneficiary--or to the owner's estate if no beneficiary is named. If you've been designated as the beneficiary of a traditional or Roth IRA, it's important that you understand the special rules that apply to "inherited IRAs."

It's not really "your" IRA

As an initial matter, while you do have certain rights, you are generally not the "owner" of an inherited IRA. The practical result of this fact is that you can't mix inherited IRA funds with your own IRA funds, and you can't make 60-day rollovers to and from the inherited IRA. You also need to calculate the taxable portion of any payment from the inherited IRA separately from your own IRAs, and you need to determine the amount of any required minimum distributions (RMDs) from the inherited IRA separately from your own IRAs.

But if you inherited the IRA from your spouse, you have special options. You can take ownership of the IRA funds by rolling them into your own IRA or into an eligible retirement plan account. If you're the sole beneficiary, you can also leave the funds in the inherited IRA and treat it as your own IRA. In either case, the IRA will be yours and no longer treated as an inherited IRA. As the new IRA *owner* (as opposed to *beneficiary*), you won't need to begin taking RMDs from a traditional IRA until you reach age 70½, and you won't need to take RMDs from a Roth IRA during your lifetime at all. And as IRA owner, you can also name new beneficiaries of your choice.

Required minimum distributions

As beneficiary of an inherited IRA--traditional or Roth--you must begin taking RMDs after the owner's death.* In general, you must take payments from the IRA annually, over your life expectancy, starting no later than December 31 of the year following the year the IRA owner died. But if you're a spousal beneficiary, you may be able to delay payments until the year the IRA owner would have reached age 70½.

In some cases you may be able to satisfy the RMD rules by withdrawing the entire balance of the inherited IRA (in one or more payments) by the fifth anniversary of the owner's death. In almost every situation, though, it makes sense to use the life expectancy method instead--to stretch payments out as long as possible and take maximum advantage of the IRA's tax-deferral benefit.

You can always elect to receive more than the required amount in any given year, but if you receive less than the required amount you'll be

subject to a federal penalty tax equal to 50% of the difference between the required distribution and the amount actually distributed.

More stretching...

What happens if you elect to take distributions over your life expectancy but you die with funds still in the inherited IRA? This is where your IRA custodial/trustee agreement becomes crucial. If, as is sometimes the case, your IRA language doesn't address what happens when you die, then the IRA balance is typically paid to your estate--ending the IRA tax deferral.

Many IRA providers, though, allow you to name a successor beneficiary. In this case, when you die, your successor beneficiary "steps into your shoes" and can continue to take RMDs over your remaining distribution schedule.

Federal income taxes

Distributions from inherited IRAs are subject to federal income taxes, except for any Roth or nondeductible contributions the owner made. But distributions are never subject to the 10% early distribution penalty, even if you haven't yet reached age 59½. (This is one reason why a surviving spouse may decide to remain as beneficiary rather than taking ownership of an inherited IRA.)

When you take a distribution from an inherited Roth IRA, the owner's nontaxable Roth contributions are deemed to come out first, followed by any earnings. Earnings are also tax-free if made after a five-calendar-year holding period, starting with the year the IRA owner first contributed to any Roth IRA. For example, if the IRA owner first contributed to a Roth IRA in 2014 and died in 2016, any earnings distributed from the IRA after 2018 will be tax-free.

Creditor protection

Traditional and Roth IRAs are protected under federal law if you declare bankruptcy. The IRA bankruptcy exemption was originally an inflation-adjusted \$1 million, which has since grown to \$1,283,025. Unfortunately, the U.S. Supreme Court has ruled that inherited IRAs are not covered by this exemption. (If you inherit an IRA from your spouse and treat that IRA as your own, it's possible that the IRA won't be considered an inherited IRA for bankruptcy purposes, but this was not specifically addressed by the Court.) This means that your inherited IRA won't receive any protection under federal law if you declare bankruptcy. However, the laws of your particular state may still protect those assets, in full or in part, and may provide protection from creditors outside of bankruptcy as well.

What is the most important component of GDP in the United States?

We often hear in the media that consumer spending is crucial to the overall health of the U.S. economy, but exactly

how important is it? Representing approximately two-thirds of overall GDP, consumption--the almighty consumer--is the largest driver of economic growth in the United States. Of the nearly \$18 trillion in U.S. GDP (2015), American shoppers are responsible for a piece of the pie worth about \$12 trillion.

Consumption is tracked by the Bureau of Economic Analysis, and is reported as Personal Consumption Expenditures (PCE) in its monthly "Personal Income and Outlays" news release. Since the late 1960s, PCE as a percentage of overall GDP has crept up from a low of approximately 58% to nearly 70% today.

PCE is divided into goods and services. The services category typically represents the largest part of PCE, accounting for more than 65% over the past two years. Examples of services include health care, utilities, recreation, and financial services.

Goods are broken down further into durable and nondurable goods. Durable goods are those that have an average life of at least three years. Examples include cars, appliances and furniture. Nondurable goods are those with an average life span of less than three years and include such items as clothing, food, and gasoline.

Durable goods represent approximately 10% of total PCE, while nondurable goods make up about 20%.

So the next time you're out shopping, for anything from a bottle of ketchup to a new car, consider that you're doing your part to fuel our nation's growth.
