Investment policy questionnaire

An investment policy questionnaire is intended to assist in determining your willingness and capacity to take on market volatility during the years in which you are accumulating assets, as well as those years in which you are taking distributions from your portfolio.

SECTION 2

Portfolio constraints

Please note that the constraints, restrictions and comments noted below are for planning purposes only.

Relevant restrictions and constraints must be specified on the completed Client Agreement(s) to be considered.

1. Liquidity constraints	
Given your personal situation and with colliquidity requirements?	onsultation with your investment advisor, how would you describe your
☐ Low (0.0% – 2.0%)	
☐ Average (2.1% – 10.0%)	
☐ High (10.0%+)	
Will the investment earnings for this port	folio be needed to meet some or all of your expenses?
Yes	
□ No	
	significant portion of your portfolio's value within the next year to meet s, purchasing real estate, college education funding or travel?
Yes	
☐ No	
	significant portion of your portfolio's value within the next one to ten years business, purchasing real estate, college education funding or travel?
Yes	
□ No	

Additional comments regarding your liquidity constraints:

2. Other constraints

Tax constraints Are there any important tax considerations or issues that should be taken into account when constructing this portfolio?
☐ Yes ☐ No
Additional comments regarding your tax restraints:
Legal constraints Are there any legal and regulatory concerns that would present an issue in the construction of the portfolio?
☐ Yes ☐ No
Additional comments regarding your legal restraints:
Unique circumstances Are there any unique circumstances that would present an issue in the construction of your portfolio?
☐ Yes ☐ No
Additional comments regarding your unique circumstances:

SECTION 3

Risk tolerance profile

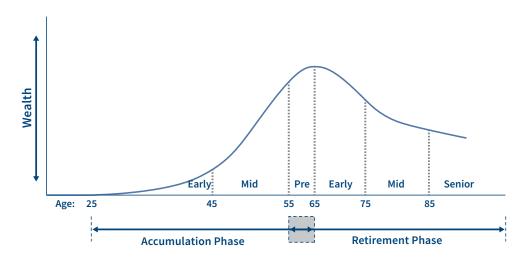

1. Life cycle position

Through the progression of age, the average individual advances through several investment phases while working toward the financial goal of getting to, and then living in, retirement. The illustration below diagrams the six different phases of an investor's life cycle based on age and wealth.

In the **Accumulation phase**, the investor is making contributions to the portfolio in an effort to save for retirement. As time moves closer to that goal, larger relative contributions, as well as **market performance and volatility**, have a significant effect on the portfolio's value.

In the **Distribution phase**, the investor is taking distributions from the portfolio to fund expenses in retirement. While market volatility is still a factor, a larger focus should be on **longevity risk** and maintaining a proper allocation to ensure that the investor's assets last throughout retirement.

The investor life cycle

Which phase best represents your position in the investor life cycle (refer to life cycle chart above):

☐ Early accumulation	(20 – 40 years before retirement)
☐ Mid accumulation	(10 – 20 years before retirement)
☐ Pre-retirement	(0 – 10 years before retirement)
☐ Early retirement	(0 – 10 years into retirement)
☐ Mid retirement	(10 – 20 years into retirement)
Senior retirement	(20 – 30 years into retirement)

Investment experience What is your overall kno			
None			
	very little investment experience outside of bar t or certificates of deposit (CD's).	nk savings accounts,	
☐ MEDIUM – I ha	ave some experience investing in mutual funds	or individual stocks/bonds.	
investments h	been an active participant in the stock market have the potential for loss and can be unpredict volatile than others.		
2. Time horizon			
will need to start withdr	tion when making investment decisions is whe awing the assets. Through consultation with yo ne horizon would indicate that you have severa	our financial advisor, please indicate y	your portfolio's appropriate time
A. Example of a short-	term horizon (1 – 4 years)		
Today	Three-years college funding		
B. Example of a long-to	erm horizon (5 – 10+ years)		
Today	12-years retirement	:	
C. Example of a multis	tage time horizon		
Today	Five-years (primary goal) Scheduled retirement	35-years (secondary goal) Post retirement	
Primary time frame Please indicate your pri	mary goal for your investment portfolio.		
☐ Planning for r	etirement		
 □ Current income generation and portfolio longevity planning in retirement □ Current income generation 			
Education			
☐ Long-term ca	pital appreciation		
Other:			

Please indicate approximately how many years from today until you reach your primary goal.
☐ Within 1 – 4 years
☐ Within 5 – 10 years
☐ Within 11 – 20 years
☐ More than 20 years
Secondary time frame Some investors have a multistage time horizon with several goals for their portfolio. Please indicate your secondary goal for your investment portfolio.
☐ Planning for retirement
Current income generation and portfolio longevity planning in retirement
☐ Current income generation
☐ Education
☐ Long-term capital appreciation
☐ Other:
Please indicate approximately how many years from today until you reach your secondary goal? Not applicable – I only have a single stage, short-term time horizon. Not applicable – I only have a single stage, long-term time horizon. Within 1 – 4 years Within 5 – 10 years More than 10 years
3. Risk and volatility
Risk tolerance Before you make a decision on any investment, you need to consider how you feel about the prospect of potential loss of principal. This is a basic principle of investing: the higher return you seek, the more risk you face. Based on your feelings about risk and potential returns, your goal is to: Potentially increase my portfolio's value as quickly as possible while accepting higher levels of risk. Potentially increase my portfolio's value at a moderate pace while accepting moderate to high levels of risk. Income is of primary concern while capital appreciation is secondary. The safety of my investment principal is my only concern.

Investment approac	ľ
--------------------	---

Which of the following statements best describes your overall approach to investing as a means of achieving your goals?

Having a relative level of stability in my overall investment portfolio
Slightly increasing my investment value while minimizing potential for loss of principal
Pursuing moderate investment growth, accepting moderate to high levels of risk and principal fluctuation
Pursuing investment growth, accepting moderate to high levels of risk and principal fluctuation
Seeking maximum long-term returns, accepting maximum risk with principal fluctuation

Volatility

The value of most investments fluctuates from year to year as well as over the short term. How would you feel if an investment you had committed to for 10 years lost 20% of its value during the first year?

I would be extremely concerned and would sell my investment.
I would be concerned and may consider selling my investment.
I would be concerned, but I would not consider selling my investment.
I would not be overly concerned given my long-term investment philosophy

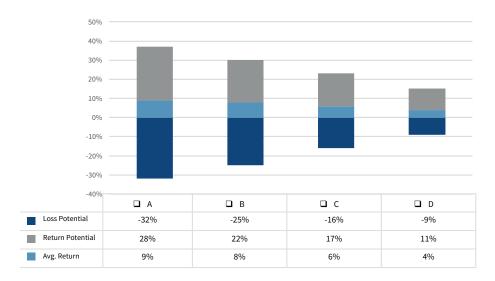

Variation

Realizing that any market-based investments may move up or down in value over time, with which of the hypothetical portfolios below would you feel most comfortable?

	YEAR 1	YEAR 2	YEAR 3	YEAR 4	YEAR 5	AVERAGE ANNUAL RETURN
□ A.	2%	2%	2%	2%	2%	2%
□ B.	12%	-5%	7%	-1%	6%	4%
□ C.	19%	-11%	14%	-3%	9%	6%
□ D.	27%	-13%	16%	-5%	11%	8%
□ E.	36%	-18%	19%	-9%	15%	9%

Risk of loss

Portfolios are designed for different potential returns, resulting in different experiences. Higher-return portfolios, like Portfolio A, assume a higher chance of experiencing a loss greater than and more frequently than a lower-return portfolio, like Portfolio D. Which of the following portfolios would you prefer to invest in over 20 years?

4. Income, savings and expenses

Household income

Total earnings, which includes earned and investment income, is a requirement when assessing your risk
tolerance and determining allocation of assets. What is your total annual household income (including
interest and tax-deferred income)?

More than	\$1,000,000
-----------	-------------

	\$400,001	- \$1	,000	,000
--	-----------	-------	------	------

	\$100,000	- \$400	,000
--	-----------	---------	------

Less than \$100,000

Future earnings

In the next five years, you expect that your earned income will probably:

- Decrease
- ☐ Stay about the same
- Increase modestly
- ☐ Increase significantly

Income savings

The percentage of your total income that you currently save is approximately:

- ☐ I do not currently save any income.
- ☐ Between 2.0% 10.0%
- ☐ Between 10.1% 20.0%
- ☐ Greater than 20.0%

Estate planning Estate planning is an important factor in the construction and risk tolerance of a retirement portf What are your expectations with regards to future gifting?	olio.
☐ I plan to draw down all of the assets in this portfolio.	
☐ I plan to gift less than 50.0% of my current investable assets to my heirs/charity.	
☐ I plan to gift 50.0% of my current investable assets to my heirs/charity.	
$\ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ \ $	
$\hfill \square$ I am in the accumulation phase of my life cycle therefore this is not applicable at this ti	me.
Annual distribution needs Based on current expenses that will need to be addressed by this portfolio, what percentage of you portfolio value do you think will need to be distributed to you on an annual basis?	our
☐ I will not need distributions from this portfolio at this time.	
☐ 0.0% – 5.0% annually	
Over 5.0% annually, including the possibility of having to withdraw principal.	
Living expense Given interruptions of periodic income or other unforeseen circumstances, some individuals are forced to tap their investment resources to meet living expenses. In such an instance, how many months of living expenses could be covered by your current liquid investments? More than 12 months, or not a concern Between 4 – 12 months Less than 4 months, or already withdrawing 5. Conclusion Please disclose any additional information pertinent to your investment needs:	
To the best of my knowledge, the information contained in this investment policy questionnaire that any recommendations are based upon the information supplied by me.	is both accurate and complete. I understand

The following list describes general investment objectives which may match with your investment goals. Please speak with your advisor to determine what the answers to your questionnaire indicates to your advisor about selecting the appropriate objective.

TOTAL POINTS

General investment objective descriptions

POINTS

36 - 48 Conservative

Current income/moderate levels of volatility

Portfolios with a Conservative objective are designed to provide some appreciation potential and current income with minimal volatility. Invested primarily in bonds with a moderate amount of stocks, this type of asset allocation may be appropriate for investors who are somewhat sensitive to market fluctuations.

49 - 60 Conservative Balanced

Current income/moderate levels of volatility

Portfolios with a Conservative Balanced objective are designed to provide moderate growth potential. With a target of nearly equal parts stocks and bonds, it seeks to strike a balance between growth and income. This type of asset allocation may be appropriate for investors who are somewhat sensitive to market fluctuations.

61 - 82 Balanced

Capital appreciation and current income/moderate levels of volatility

Portfolios with a Balanced objective are designed to increase in value over time and provide strong growth potential. Invested with a greater exposure to equities for their higher total return potential, this objective includes a meaningful allotment of bonds to help limit volatility and mitigate risk, as well as provide income. This type of asset allocation may be appropriate for investors who can accommodate a moderate level of risk.

83 - 103 Balanced with Growth

Capital appreciation/elevated levels of volatility

Portfolios with a Balanced with Growth objective are designed to create greater potential for capital appreciation. Invested significantly in stocks for their higher total return potential, this objective also includes a moderate amount of bonds to help provide income, lower volatility and mitigate risk. This type of asset allocation may be appropriate for investors who can accommodate a moderate level of risk.

104+ Growth

Long-term capital appreciation/elevated levels of volatility

Portfolios with a Growth objective are designed to increase in value over time and provide strong growth potential. Invested almost entirely in stocks for their higher return potential, this type of asset allocation may be appropriate for investors who can accommodate a moderate to high level of risk.
